As for the modernization of the institution, according to some points recommended by the Modernisation Agenda 2001, the Accademia Albertina follows the directives of the Ministry of Education regarding the implementation of Schools and courses dedicate to the application to new technologies in art.

As for point 2.3 "Strengthening quality through mobility and cross-border co-operation", the institute is focusing in better controls for the didactical offer and for the international programs quality, also easing the academic qualifications recognition procedure. We are proposing international workshops and art exhibitions as a showcase for the best students coming both from our and partners institutions.

We developed, together with a chinese agency, an agreement for the selection of the best perspective students who want to study in our institute.

As for point 2.4 "Making the knowledge triangle work: Linking higher education, research and business for excellence and regional development", Accademia Albertina actively proposes work placement for student in Torino, in the Piemonte region and abroad. The international incoming students are also involved in these placements. Making a permanent connection between the study years in Academy and a internship time in art galleries, theatres and TV studios is one of the priorities of this institute.
